

**FIRE SAFETY**

# **FIRE : THE BASICS INDUSTRIAL SECTOR**

**E-LEARNING TRAINING  
MODULE**

**COMPLIANT WITH THE ARTICLE  
R4141-3 OF THE FRENCH LABOUR  
CODE**

## General

- **Material** : E-learning
- **Duration** : 30 minutes
- **Fees** : Consult us

**For further informations :**  
**02.41.20.06.20**

Every worker must receive safety training, particularly in understanding what to do in the event of a fire.

The aim of this e-learning course is to present the basic elements needed to prevent fires in an industrial environment (maintenance and periodic checks, compliance with instructions, managing work with a fire permit, prevention plan, etc.). The e-learning course also presents the essential elements you need to know to fight a fire (organisation of fire-fighting teams, actions to be taken, etc.).

## Audience

This module is aimed at staff in industrial establishments (employees, temporary workers, interns, etc.).

## Objectives of the training

At the end of the “Fire: the basics” training, the learner will, in particular, be able to:

- identify the main causes of fire;
- understand the development and spread of a fire;
- know the main measures aimed at preventing the occurrence of a fire;
- identify and implement emergency means aimed at promoting the fight against fire and limiting its spread;
- organize yourself as a team and adopt consistent behavior during a fire.

## Training content

---

### Part 1 : Training

#### Introduction

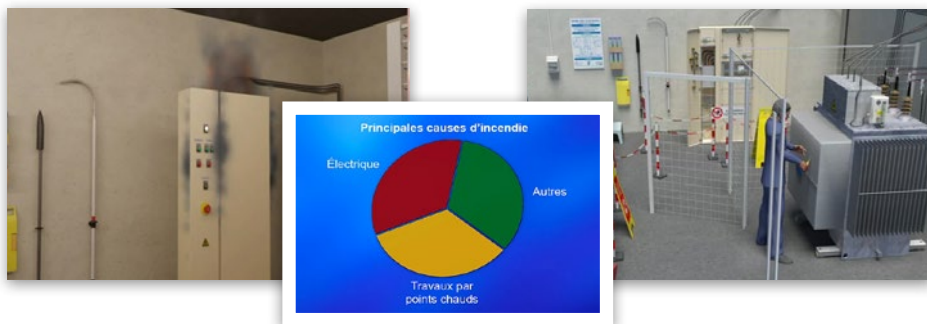

**Chapter 1 : Fire fighting theory**

**Chapitre 2 : Fire extinguishing**

**Chapitre 3 : Fire safety organisation**

**Chapitre 4 : Intervention**

The module includes numerous exercises and filmed scenarios. It is supplemented by a downloadable summary document. The learner can consult this document whenever necessary.

### Part 2 : Assessment

At the end of the training, the learner is evaluated. The analysis of the results obtained makes it possible, when necessary, to implement appropriate corrective measures. A knowledge positioning test – offered before the training – can also complete this module.

## Media

---

This e-learning module is made up of multimedia animations: video, photographs, 2D/3D animations.

## Usage

---

Train your learners via a distance learning platform.

This e-learning module can be :

- installed on the e-learning platform provided by Fictis Prévention ;
- installed on your own e-learning platform.

## Customisation of the module

---

This module can be personalised in terms of the content and/or the structure; we can integrate:

- your specific features: establishment, risks, instructions, etc....
- your graphic charter.

## Related products

---

**This product is also available on USB key.**
