Fire in the workplace: the human and material consequences can be disastrous.

That's why every worker must receive safety training, so that they understand what to do in the event of a fire.

The aim of this e-learning course is to present the basic elements needed to prevent and fight fires in the tertiary sector.

## Audience

This module is aimed at any employee in the tertiary sector.

## Objectives of the training

This distance training aims to raise awareness and train your staff in the basics of fire safety in the tertiary sector.

At the end of the “Fire: the basics” training, the learner will, in particular, be able to:

- identify the main causes of fire and its effects;
- take into account the development and spread of a fire;
- know the main fire risk prevention measures;
- identify and implement emergency means adapted to the nature of the risk.

# Training content

## Part 1 : Training

### Chapter 1 : Fire fighting

#### Definitions

#### Principles of combustion

Principles of combustion

The fuel

The oxidizer

Activation energy

Fundamental principles

#### Fires

The main causes of fire

Fire phases

Way in which fire spreads

Effects of fire

Classes of fire

### Chapter 2 : Means of initial response

Extinguishing agents

Portable extinguishers

Handling extinguishers

The module includes numerous exercises and filmed scenarios. It is supplemented by a downloadable summary document. The learner can consult this document whenever necessary.

## Part 2 : Assessment

At the end of the training, the learner is evaluated. The analysis of the results obtained makes it possible, when necessary, to implement appropriate corrective measures. A knowledge positioning test – offered before the training – can also complete this module.

## Media

This e-learning module is made up of multimedia animations: video, photographs, 2D/3D animations.

## Usage

---

Train your learners via a distance learning platform.

This e-learning module can be :

- installed on the e-learning platform provided by Fictis Prévention ;
- installed on your own e-learning platform.

## Customisation of the module

---

This module can be personalised in terms of the content and/or the structure; we can integrate:

- your specific features: establishment, risks, instructions, etc....
- your graphic charter.

## Related products

---

**This product is also available on USB key.**
