Driving is a job in its own right.

However, taking to the road is not without its risks: road accidents on mission account for 25% of fatal accidents at work (source INRS).

Fictis Prévention has developed a self-training e-learning module for your employees on «Road risk prevention».

This module covers journeys made as part of professional missions. The various prevention methods can also be used for everyday journeys.

Become a Safety Actor.

Audience

This e-learning module on «Road risk prevention» is designed for :

- sales representatives ;
- technical and maintenance departments ;
- professional drivers ;
- any person exposed to road risk as part of their professional duties or during commuting to and from work.

Objectives of the training

The aim of this distance learning course is to raise awareness and train your staff in road risks.

By the end of the course, learners will be able to :

- identify and become aware of road risks ;
- Know and adopt good habits ;
- change their behaviour at the wheel.

Training content

Part 1 : Training

Chapter 1 :

What are the risks ?

- Road risks
- Statistical data
- Other risks
- Liability and penalties

Chapter 2 :

Risks factors

- The driver
- The environment

Chapter 3 :

Preventive measures

- The vehicle
- The driver
- Other road users

Chapter 4 :

Driving risks on assignment

- Specific risks
- Preventive measures

The training module is completed by a summary document that you can download. The learner can consult this document whenever necessary.

Part 2 : Assessment

At the end of the training, the learner is evaluated. The analysis of the results obtained makes it possible, when necessary, to implement appropriate corrective measures. A knowledge positioning test – offered before the training – can also complete this module.

Media

This e-learning module is made up of multimedia animations: video, photographs, 2D/3D animations.

Usage

Train your learners via a distance learning platform.

This e-learning module can be :

- installed on the e-learning platform provided by Fictis Prévention ;
- installed on your own e-learning platform.

Customisation of the module

This module can be personalised in terms of the content and/or the structure; we can integrate:

- your specific features: establishment, risks, instructions, etc....
- your graphic charter.
