Digital educational solutions :
Health - Safety - Quality of life at work

SUMMARY

FICTIS
PRÉVENTION

Since 2002, FICTIS PREVENTION has produced digital communications and innovative training in the areas of « Health, Safety and Quality of Life at Work ».

FICTIS PREVENTION advises its clients and allows companies, training organizations, health services, etc. to :
- meet regulatory requirements for occupational health and safety training
- rationalize the effectiveness and cost of their information and training actions
- develop a culture of prevention

FICTIS IS DATADOCK REFERENCED AND QUALIOPI CERTIFIED

Off-the-shelf Solutions

E-learning training

A complete catalog with more than 100 shelf references on the main themes of « Health, Safety and Quality of life at work ».

Modules hosted on our platform or on your platform

Tablet compatible and smartphone

Customizable to your colors

Training materials

These recognized and expert educational materials are intended for trainers and available in USB key format.

Educational booklets and leaflets

FICTIS PREVENTION produces checklists and educational booklets for training organizations, administrations, communities, businesses, CSEs, etc. who wish to :
- optimize the impact of training actions on trainees ;
- raise awareness among employees of a Health and Safety risk at work.

Mobile app

Application dedicated to Health, Safety and Quality of life to disseminate your awareness campaigns and to allow easy access to content.

Virtual reality

Virtual Reality immerses employees in risky professional situations, and optimizes the process of learning good behavior and good practices.

AND MANY OTHER EDUCATIONAL PRODUCTS: SIMULATOR, QUIZ, SERIOUS GAME, POSTERS...

Tailor-made Solutions

In order to guarantee customer satisfaction, a project manager correlates your needs with the most relevant technical solutions. Our intermediate validation process (models, visuals, etc.) allows you to follow the progress of the project, in relation to the jointly validated schedule.

By adapting existing products or creating tailor-made products, in your colors, we ensure the adequacy between the solutions offered and your specific needs.

Additional Services

FICTIS has developed and evolved its e-learning platform as well as its services dedicated to monitoring your e-learning training :
- development of a personalized environment in your colors ;
- notifications, reminders by email to trainees ;
- user support (via our own helpdesk) ;
- assistance with integration into your LMS platform ;
- generation and analysis of reports ;
- delegation of administration (creation of trainees, notifications, reminders by email, etc.) ;
- etc.
# Themes covered

Safety managment

Hardness at work

E-learning training

FICTIS offers online educational training (e-learning) covering a wide range of themes raising awareness of the risks linked to professional activity.

What is it ?

E-learning training is an online solution that allows you to train and raise awareness of professional risks among your employees, so that they can acquire knowledge and skills, through the use of various educational resources (interactive media / 2D videos / 3D / filming / illustrations / quizzes / etc.)

This solution can be consulted on various media :

Smartphone	Tablet	Computer

Advantages

Accessibility   Flexibility   Interactivity   regulatory

Options : customization on the background or on the form

Training materials

Training materials (USB keys) allow you to optimize the impact of your training activities by enriching your training with recognized and expert materials.

Energize your training sessions

Provide additional information and knowledge

Educational booklets and leaflets

FICTIS PREVENTION produces checklists and educational booklets for training organizations, administrations, communities, businesses, CSE,… who wish :
- optimize the impact of training actions on trainees ;
- raise awareness among employees of a Health and Safety risk at work.

Digital version

Digitize your educational booklets!

Offer digital booklets and leaflets to your trainees to complement, or replace, the traditional booklets provided for the summary reminder of the key concepts covered during awareness-raising actions.

The benefits

€ Reduce your costs

Digitize your offer

Remove your logistical constraints

Improve your CSR
Differentiate yourself from your competitors

Option : adaptation to your graphical charter

Posters

FICTIS offers you posters to convey prevention messages to your teams and/or your trainees.

These posters can be delivered from A4 to A0 format.

System of fire detection

How to react in case of fire ?

Means of protection against electricity-related risk

Electric delivery station

Environment zones

Move a load

Lift a load

Command gestures - MEWP

Command gestures - Hoists

Mobile staff elevating platforms

Risk prevention asbestos : PPE

Options : customization on the background or on the form

Educational devices : Risky situations

« Risk situations » are a complete, fun and participatory system to liven up your Safety days and your 1/4 hour safety sessions. Each participant analyzes their environment and identifies the dangers surrounding them then discovers the associated prevention measures. It is offered in paper version and in digital version.

Animated version :

From a PC, a tablet or a smartphone, the employee is immersed in a given environment. He must become aware of the existing risks and discover the 15 dangerous phenomena and situations of exposure to danger.

The device also provides the relevant answers at the end.

General security

Road risk

Options :
your logo,
your contact details
magnet kit

Paper version :

Trainer kit composed of :
- a poster (A1) of risky situations ;
- a poster (A1) of corrected risk situations ;
- a blank trainee form (A4) ;
- a double-sided trainee answer key (A4) ;
- a training guide.

General security

Road risk

Options :
your logo,
your contact details
magnet kit

Sign & Use

What is it ?

Sign & Use is an intuitive and very easy-to-use application, which will allow you to follow the distribution of the product.

The service can be presented in two forms:

Physical products	Dematerialized (digital) products

3 existing roles

Collaborater	Manager	Responsible administrative

Fast, simple and reliable

Tracking groups and product stocks

Accessible app online

Certificate of delivery of products via payroll forms

Data hosted and saved on a secure server

Service available soon.

MerlinßOx

MerlinBox is the solution that allows trainers to easily run effective training sessions, anywhere. MerlinBox has its own WiFi network, interactive training tools and an e-learning module platform.

Give a new dimension to your training sessions!

Total autonomy	MerlinBox generates its own WIFI network : **you can use it anywhere !**
E-learning platform	Thanks to the integrated e-learning platform, do self-training in person. **Combine the advantages of e-learning training and face-to-face training.**
Interactive tools	Boost your classroom training sessions with collaborative boards, real-time surveys, etc. **Develop interactivity with your trainees!**

Compatible with tablets and smartphones

Virtual reality

Virtual reality makes employees active participants in their health at work, who more easily adopt the prevention message(s). Immersion in the virtual world, modeled as closely as possible to the existing world, improves memorization and understanding of the risks encountered.

FICTIS supports you in carrying out your projects, according to your objectives and needs.

Examples of use :

Training of technical personnel working in special conditions or in delicate, rare conditions, or both :
• intervention in confined spaces ;
• intervention in the nuclear sector, …

Learning technical gestures, operating equipment :
• crane operation ;
• truck driving ;
• production line management, ...

Recognition of particular situations and implementation of appropriate responses :
• safety reception on a construction site ;
• awareness of risks in a warehouse, etc.

**Innovative event animation, integration into your SAFETY DAYS !**

THE REFERENCE
for S.S.I. training

The SSI simulator allows training in the operation of a fire safety system without the constraints of training on a traditional S.S.I.

Effective and innovative, it can be used :
• to lead group training sessions ;
• self-training ;
• in evaluation and examination configuration.

Analogous system recognized for SSIAP exams by the Marseille Firefighter Battalion, and numerous SDIS (SDIS 13, SDIS 38, SDIS 44, SDI 05, etc.) which meets the definition of a planned computerized virtual simulator by Annex XI of the "SSIAP 1" decree of November 5, 2010.
